TATTOO ARTIST: \_\_\_\_\_

## TATTOO AFTERCARE

**IMPORTANT:** If you have any problems or questions please stop in and/or call immediately as it is very important to us that your tattoo heals properly.

Leave Bandage on for (      ) hour(s) than remove.

### DAILY CARE:

1) Gently wash with fingertips 1 time a day or as needed with a fragrance free mild soap.

!!DO NOT USE ANTI-BACTERIAL SOAP!!

2) Completely rinse with COLD water and gently pat dry

3) Let it air dry for 20 MINUTES.

4) Apply a THIN layer of ointment and gently massage it into the tattooed area.

5) Wait 15 MINUTES. Then LIGHTLY blot off excess ointment with a paper towel.

6) Wash 1 time a day, apply ointment 3 times a day or as needed until tattoo is fully healed

RECOMMENDED OINTMENTS: AQUAPHOR® (made by Eucerin®)

-or- \*Preparation-H ointment® (original) \*for swelling or inflamed skin.

!!DO NOT USE!!

Vaseline, cream based ointments, or ointments with extra additives, such as pain relief or aloe, or anti- bacterial soaps. If any irritation from the ointment is noticed, such as continued redness or rash.

IMMEDIATELY discontinue use and consult your artist for alternatives.

### HEALING PROCESS:

Tattoo will "weep" (secrete plasma) for up to 48 hrs. This may require extra washing depending on the individual, during this time.

With proper care of the tattoo, it will form a thin scab over the tattoo that will begin to flake off

in 3 to 7 days. It is very important that when the flaking starts to NOT PICK or SCRATCH the tattoo. This will damage the tattoo.

Once the tattoo is finished flaking, the critical part of the healing process is over.

The tattoo may appear shiny or cloudy at first due to the freshly healed skin.

It is still important not to hit or damage your tattoo during this time; you should apply Aquaphor® daily until the skin is completely healed.

### TATTOO DAMAGING ELEMENTS:

Excessive friction from clothing or other factors will irritate and damage the tattoo during the healing process.

Heat, steam and water can prolong the healing process and damage the tattoo.

NO SWIMMING, BATHS, HOT SHOWERS, TANNING, OR DIRECT SUNLIGHT

Don't be afraid to consult a doctor if you have problems with your tattoo, If you have any questions you can also email Crowned Raven Tattoo Inc.

crownedraventattoo@gmail.com and talk to one of our knowledgeable staff. Each client receives one free touch up with the purchase of a tattoo.
